

LIFT RANGE: HIGHER AND FASTER

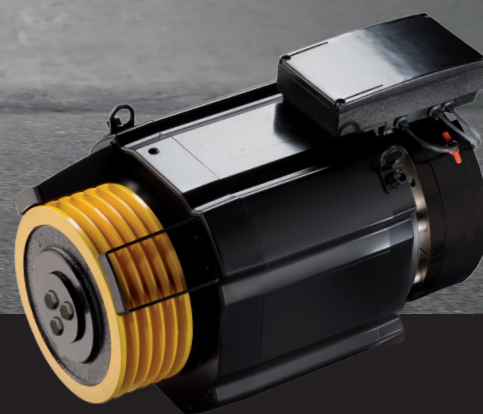

HIGHER APPLICATION

HIGHER PAYLOAD

HIGHER SPEED

Lafert LIFT range, from the experience of a fully skilled motor manufacturer: Permanent Magnet Gearless Machines that give high performance and long life even in critical environmental conditions.

- Extended range with rated torques up to 850Nm and payload up to 1600kg - this provides suitability for the majority of applications requiring high payload capacity
- Range widening with gearless machines for system speed up to 2,5m/s to satisfy the ever increasing demand for high speed especially with regards to higher applications
- Brake hand release levers with very small overall dimensions for easy installation in modernisations and new buildings where the space is often limited
