

OUR FIRST 50 YEARS  
PASSED WITH PASSION  
AND COURAGE

## EXCELLENCE AND INNOVATION

**High Performance** is a range of variable speed synchronous motors **0.37 kW to 22 kW**; equipped with sensorless drives, it is specifically designed for its energy saving potential and renewable energy applications.

**Permanent magnet technology**, very high efficiency, compact design, reduced weight, low operating temperature and limited costs make them the ideal product to enter a new era of design for industrial machines.
