

FROST & SULLIVAN

2013 BEST PRACTICES AWARD

EUROPEAN
ELECTRIC MOTORS FOR HVAC APPLICATIONS
NEW PRODUCT INNOVATION LEADERSHIP AWARD

INNOVATION IS TRUE TALENT

To go beyond the 'now' technology requires inspired talent with commitment to achieve the future.

For Lafert, there is no grander expression of this than the innovative designs of its new motors – lighter, more compact and embracing energy efficient technology for greater environmental sustainability!

A true talent, appreciated and acknowledged internationally as illustrated by receiving the European New Product Innovation Leadership Award for electric motors for HVAC applications for its HP 2.0 Synchronous PM IE4 Motor, awarded by Frost & Sullivan.
